-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Detailed Action

Applicant cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Status of the Application

Claims 1- 11 are pending in this application.

An amendment filed on February 28, 2004 to the claims 1-11 has been entered.

Claims 1-4 and 7 are rejected.

Claims 5-6 and 8-11 are objected.

Numerous Errors in Specification

35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph.

Examples of some unclear, inexact or verbose terms used in the specification are: such as page 2 and page 3 consists of same information i.e., identical. Furthermore, on page 5, lines 14-15 and lines 24-25 appears to have repeating the sentence. Correction is required

Drawings Objected To

The drawings are objected to because figures 1 and 2 should be labeled as a "Prior Art". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

If applicant is aware of any prior art or any other co-pending application not already of record, he/she is reminded of his/her duty under 37 CFR 1.56 to disclose the same.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 - 4 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Admitted Prior Art (figures 1-2).

Note that Figure 2 clearly teaches the claimed subject matter as claimed in claims 1-4 and 7. The spatial selector SE1 and SE2, SE1 selector comprises L is an optical ports G1, optical coupler , optical gate i.e., optical switch, L inputs receive a WDM signal, special selector SE2 comprises a demultiplexer, a multiplexer, SE1 send to its output only one of the L signals Ft which is received and an amplifier At. For details see Background of the Invention.

Claims Objected, Allowable Subject matter

Claims 5-6, and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Cited Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stein (USP NO. 5,365,358), Sauze et al (US publication no. 2002/0071157 A1) and Sharony et al (5,495,356) are also cited to show a typical module for an optical switch respectively.
